日本沖繩科學技術大學院大學(OIST)最新博士生學程(2012年9月入學)，相關內容及申請方式請有興趣同學參閱以下資訊：

Call for applications: PhD Program at the Okinawa Institute of Science and Technology (OIST) Graduate University

Closing date: Applications currently open on a rolling basis

The Okinawa Institute of Science and Technology (OIST) Graduate University is now accepting applications for admission to the PhD program for the **September 2012** intake. We are looking across the globe for students who will flourish in an atmosphere of encouragement for discovery and innovation. With over half of OIST students and faculty coming from outside Japan, OIST offers the highest level of graduate education while embedded in a truly international environment. About 50 cutting-edge laboratories conducting research in a range of fields form the hub of the OIST Graduate University. Based on a firm foundation in the basic sciences, we promote education that is highly interdisciplinary. The graduate program features interactive teaching with tutorial-style courses providing preparation for thesis research. Course design is customized to the unique needs of individual students. From the beginning, students work side by side with world-class faculty and researchers in well-equipped laboratories.

We are selecting our first class of graduate students and we would like the opportunities for graduate studies at OIST to be as widely known as possible. Our intake will be limited to about **20 students per year**, and we aim to recruit excellent students. All students receive an internationally competitive support package, with a research studentship of 2.4 million yen per year, fees paid, and subsidized on-campus housing. Students with a Bachelor's degree normally take five years to graduate. Those with a Master's degree can finish in three or four years, depending on their level of preparation. Students may be given credit for courses and laboratory work completed at another university. For example, a student may receive credit for graduate courses completed as part of an MSc in a relevant area.

More information about the program and how to apply on-line is available at: <http://www.oist.jp/graduate-school>
